Features:

High Speed Winding Machine is to deal with the small coil products and transformer industry demand of high production to study and production of high speed winding machine, with high speed, low sound, winding stable.

Meanwhile winding 8 group products, and time efficient. This machine design of 32 bit controller chip, It'll be faster and higher reliability.

In Chinese and English display,High Speed Winding Machine is easy to operation,winding data retention after power failure, not to discarded products.

All the parts for High Speed Winding Machine are imported prats,such as:Japan Bearing (NSK、NTN),Japan BANDO belt ,U.S.A GATES belt,Taiwan Ball screw (TBI),Taiwan AC Drive and so on.

Synchronous motor coil,Solenoid valve coil , Water pump coil , Clock coil and any other special coils.

Advantages:

High Speed Winding Machine is using the LCD latest synchronization with the coupling cable controller.

With self detection, including setting error, speed tracking and velocity calibration optional lifting speed of main spindle

To start the operation speed of the spindle motor to climb time can decide for ourselves, to guarantee the product quality of winding.

APPLICATION:

High Speed Automatic Coil Winding Machines are used for winding the small EI transformers, signal transformers, inductors, filter choke coil, relays, current contactors, valve coils, solenoid coils, telecom bobbin transformers. It can complete the coils without any one operator in fully automatically.
